WHO WE ARE & WHAT WE DO

- Research: Conduct studies on climate opinion and behavior
- Partnerships: Help others use insights to build public and political will for climate action

Recent Toplines from Climate Change in the American Mind

Nationally representative survey of 1,033 U.S. adults (18+)
Avg. margin of error = +/- 3% points

Global Warming's Six Americas

Global Warming's Six Americas Over the Last Decade

Base: 25,368 U.S. adults. Data include 22 waves of national surveys spanning April 2013 – October 2023.

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

Most Americans (72%) think global warming is happening

Do you think global warming is happening?

Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

A majority of Americans (58%) think global warming is mostly human-caused

- Think global warming is caused mostly by human activities
- Think global warming is caused mostly by natural changes in the environment

Assuming global warming is happening, do you think it is . . .

Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

About half of Americans (53%) understand that most scientists think global warming is happening

- Most scientists think global warming is happening
- There is a lot of disagreement among scientists
- Most scientists think global warming is NOT happening

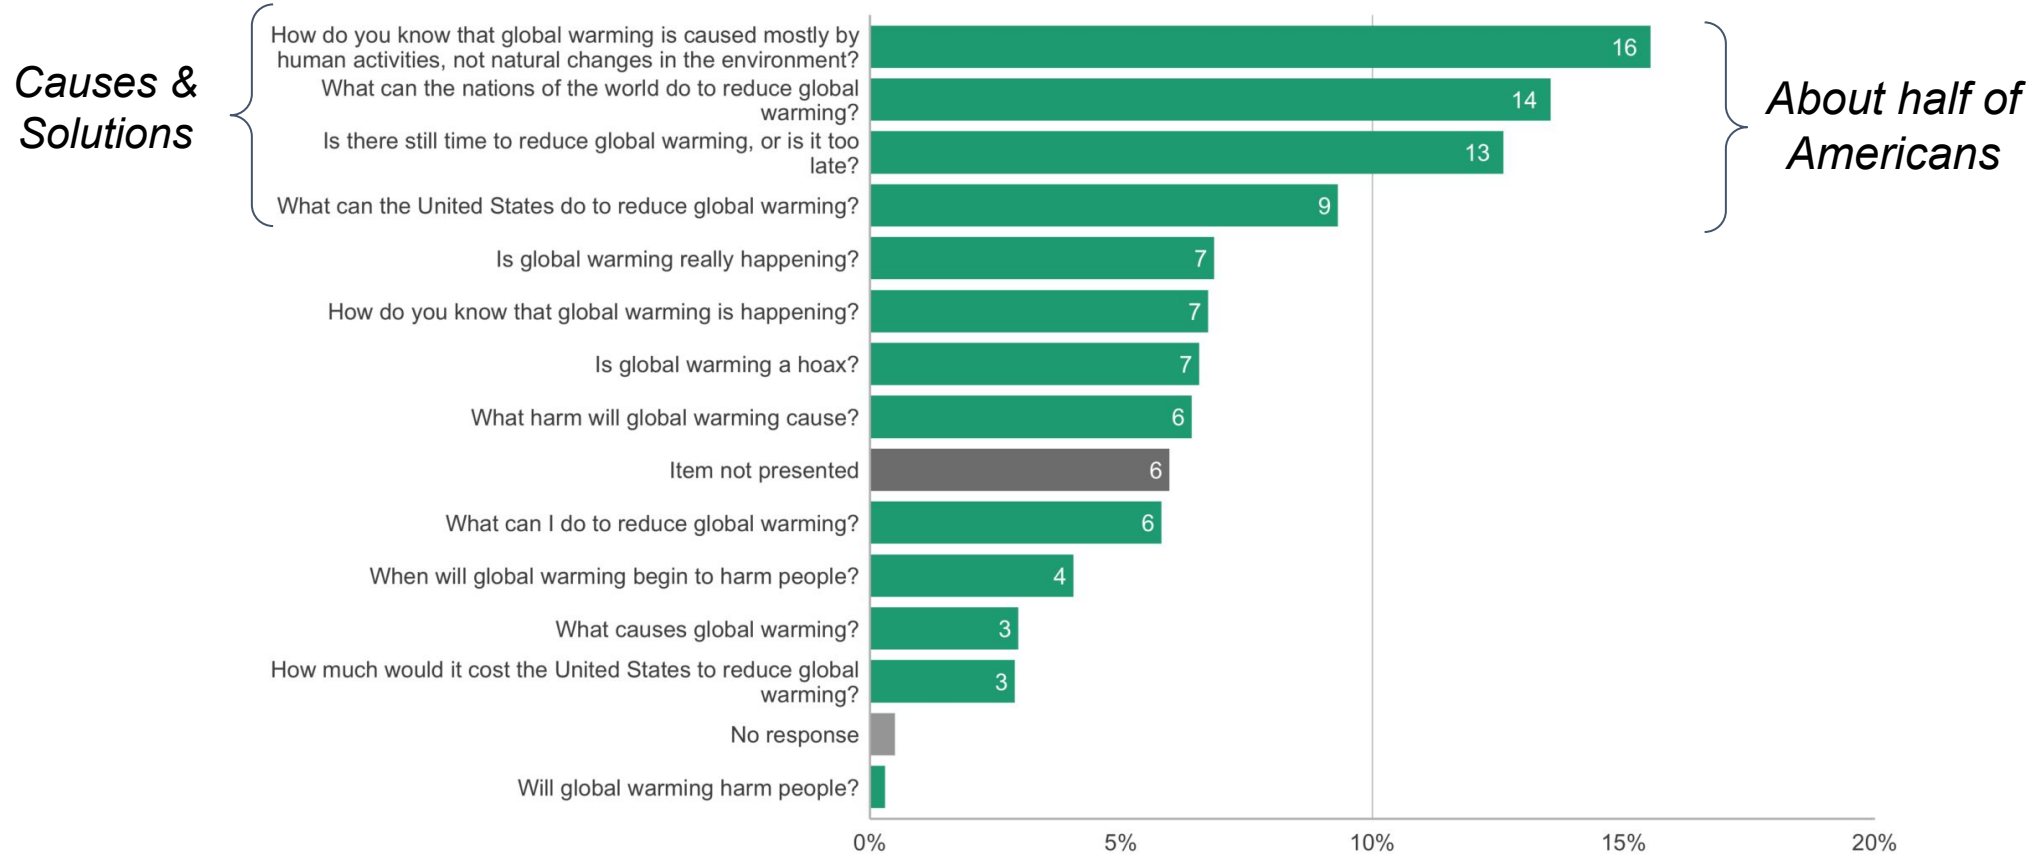

What comes closest to your own view?

Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

When asked to choose one question for a global warming expert, Americans most want to know about *causes and solutions*

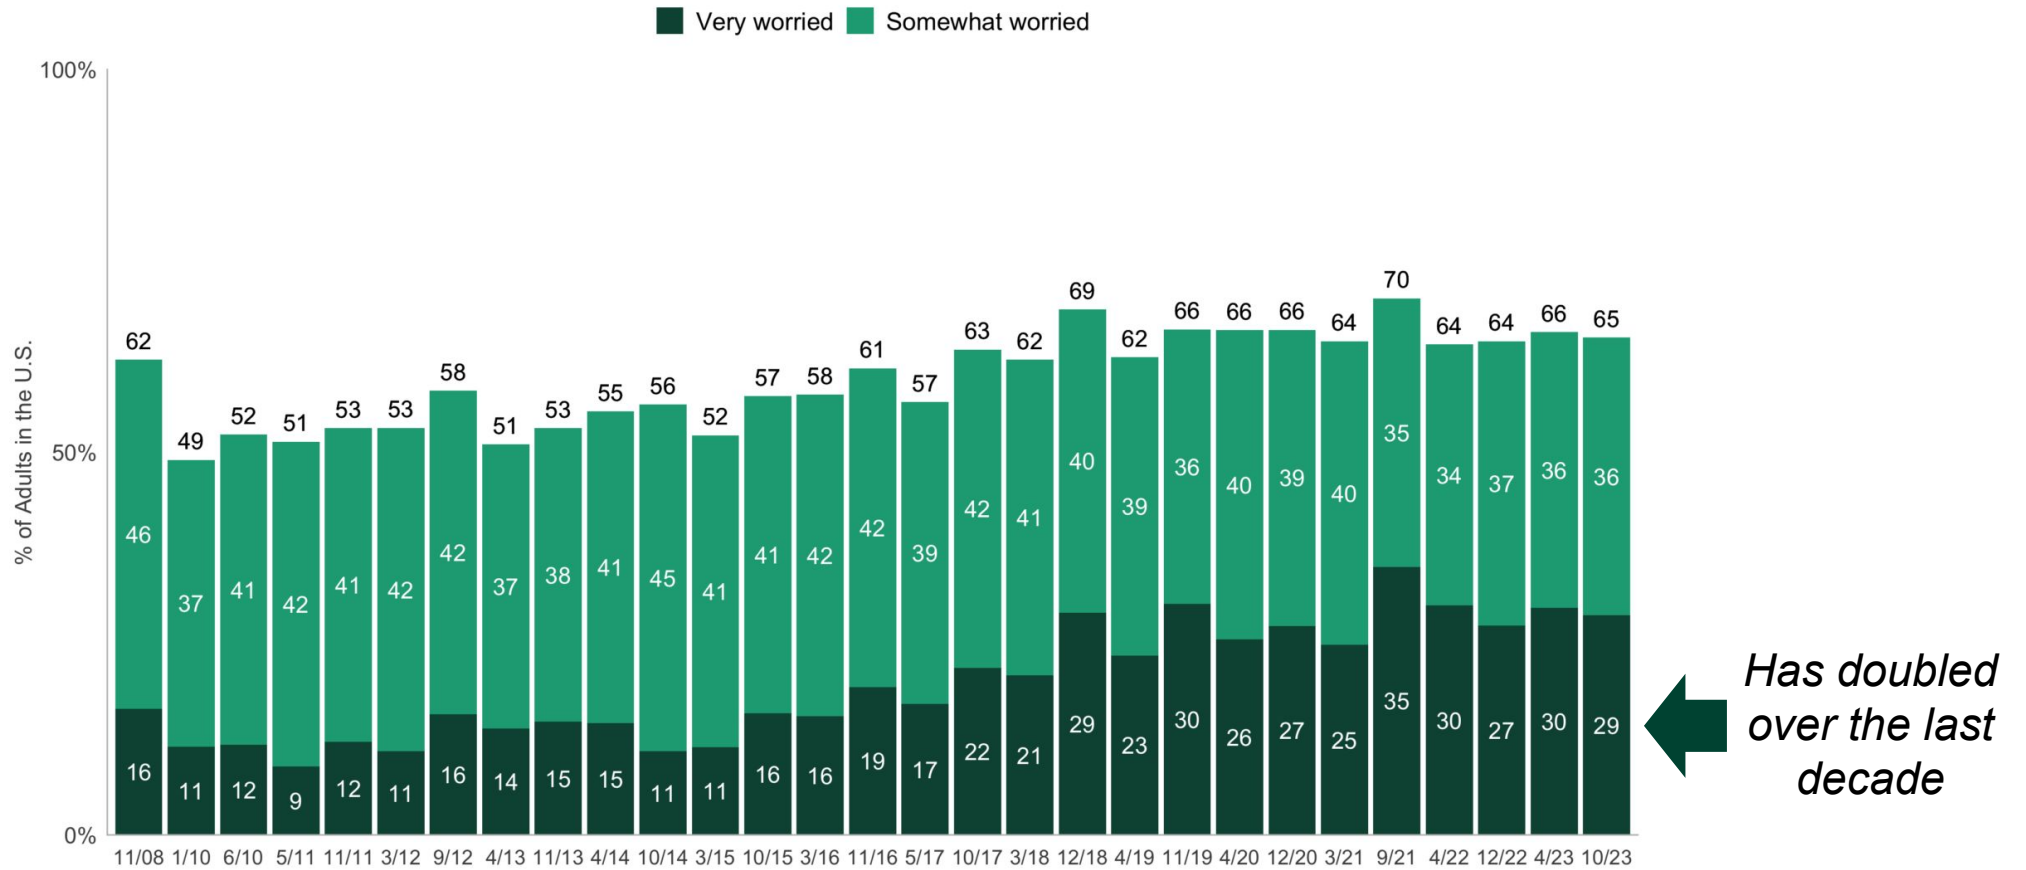

If you could ask the expert on global warming
ONLY ONE QUESTION, which question would you ask?

Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

A majority of Americans (65%) are worried about global warming

Has doubled over the last decade

How worried are you about global warming?

Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

About 1 in 10 Americans are experiencing psychological distress because of global warming

Over the last 2 weeks, how often have you been bothered by the following problems?

Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

Many Americans (43%) say they have personally experienced the effects of global warming

How much do you agree or disagree with the following statement? I have personally experienced the effects of global warming.

Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

Many Americans think global warming will harm them, but more think *others* will be harmed

How much do you think global warming will harm . . . ?

Fall 2023

A majority of Americans (61%) think global warming is affecting the weather in the U.S. at least “a little”

Only 33% say “a lot”

■ Affecting the weather a lot ■ Affecting the weather a little/Don't know how much ■ Not happening
■ Affecting the weather some ■ Not affecting the weather ■ Don't know/No response

Which statement best reflects your view? (a) Global warming is affecting weather in the United States; (b) Global warming is not affecting weather in the United States; (c) Global warming isn't happening; (d) don't know; (e) Prefer not to answer. [If (a) selected] How much do you think global warming is affecting weather in the United States?

Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

A majority of Americans are worried about harm from environmental problems in their local area

How worried are you that the following might harm your local area?

Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

Most Americans (65%) “rarely” or “never” discuss global warming with family and friends

How often do you discuss global warming with your family and friends?

Americans' Views on Climate Justice & Climate Policy

Nationally representative survey of 1,033 U.S. adults (18+) 906 of whom are registered to vote. Climate justice report: 1,011 U.S. adults (861 registered voters)
Avg. margin of error = +/- 3% points

About one in three Americans (34%) say they have heard or read at least “a little” about climate justice

Americans 18+, Spring 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

About half of Americans (53%) say they support the goals of climate justice after learning about them

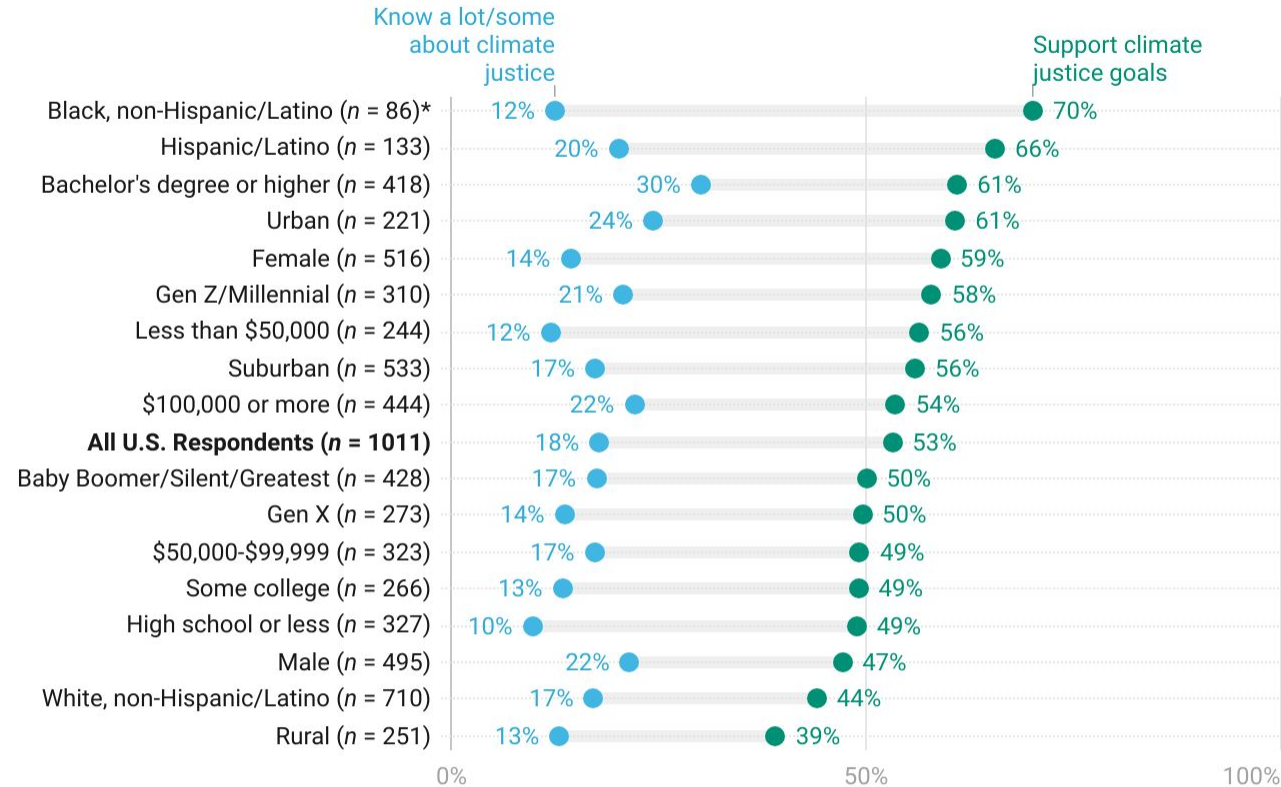

Climate justice refers to the idea that global warming affects everyone, but certain communities are harmed more than others, especially low-income communities and communities of color. The goals of climate justice are to reduce these unequal harms, include these communities in decision-making, and ensure they receive a fair share of the benefits of climate action (such as good jobs, cleaner air and water, better health, etc.). How much do you support or oppose the goals of climate justice?

Americans 18+, Spring 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

Across many demographic groups, a majority support the goals of climate justice after learning about them

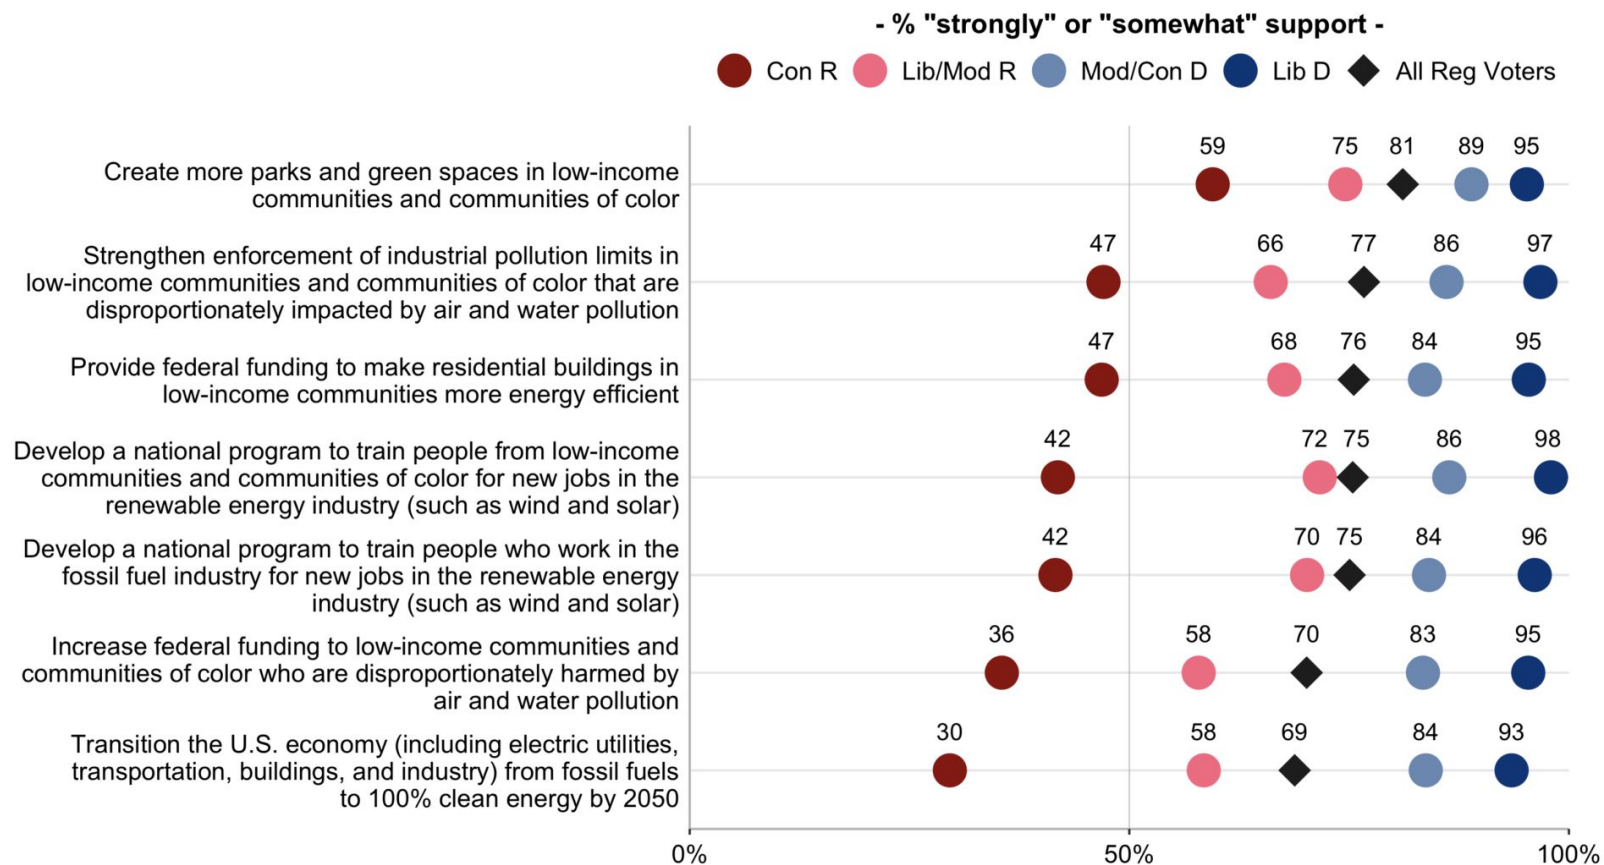

[Left] How much, if anything, have you heard or read about climate justice? Have you heard... % "A lot" or "Some"
 [Right] How much do you support or oppose the goals of climate justice? ... % "Strongly support" or "Somewhat support"

April 2023. Base: 1,011 U.S. adults.

* Denotes groups with small sample sizes so results should be interpreted with caution

 George Mason Center for Climate Change Communication • Created with Datawrapper

A large majority of registered voters support policies that promote climate justice goals

Bipartisan support for green spaces

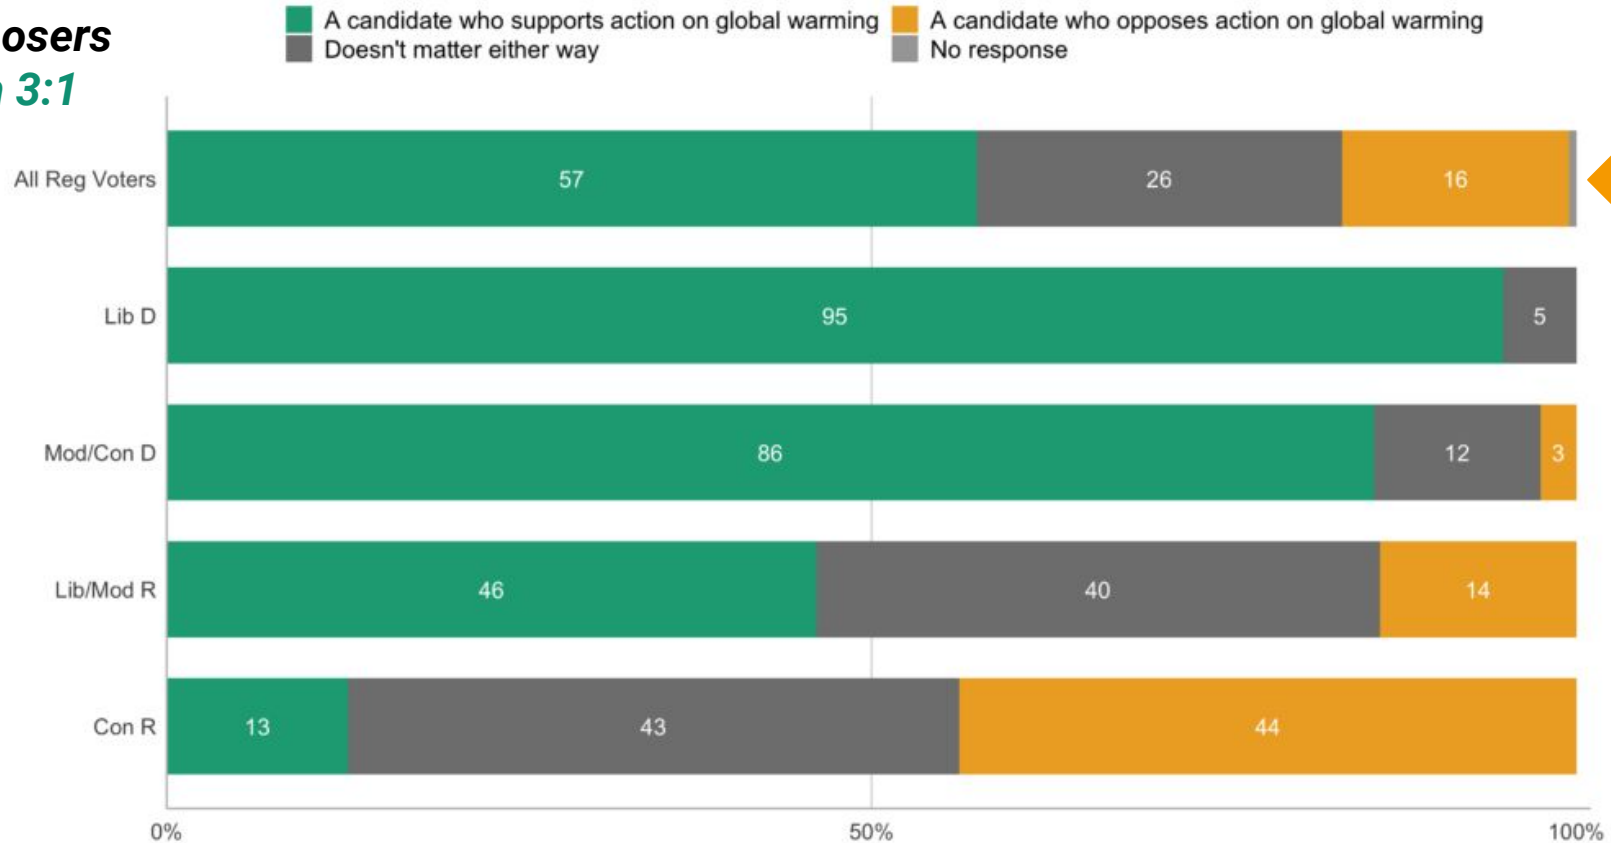

How much do you support or oppose the following policies?

Registered U.S. voters, Spring 2023

Source: Yale Program on Climate Change Communication; George Mason University Center for Climate Change Communication

Most registered voters (57%) would prefer to vote for a candidate who supports action on global warming

Supporters > Opposers
Ratio more than 3:1

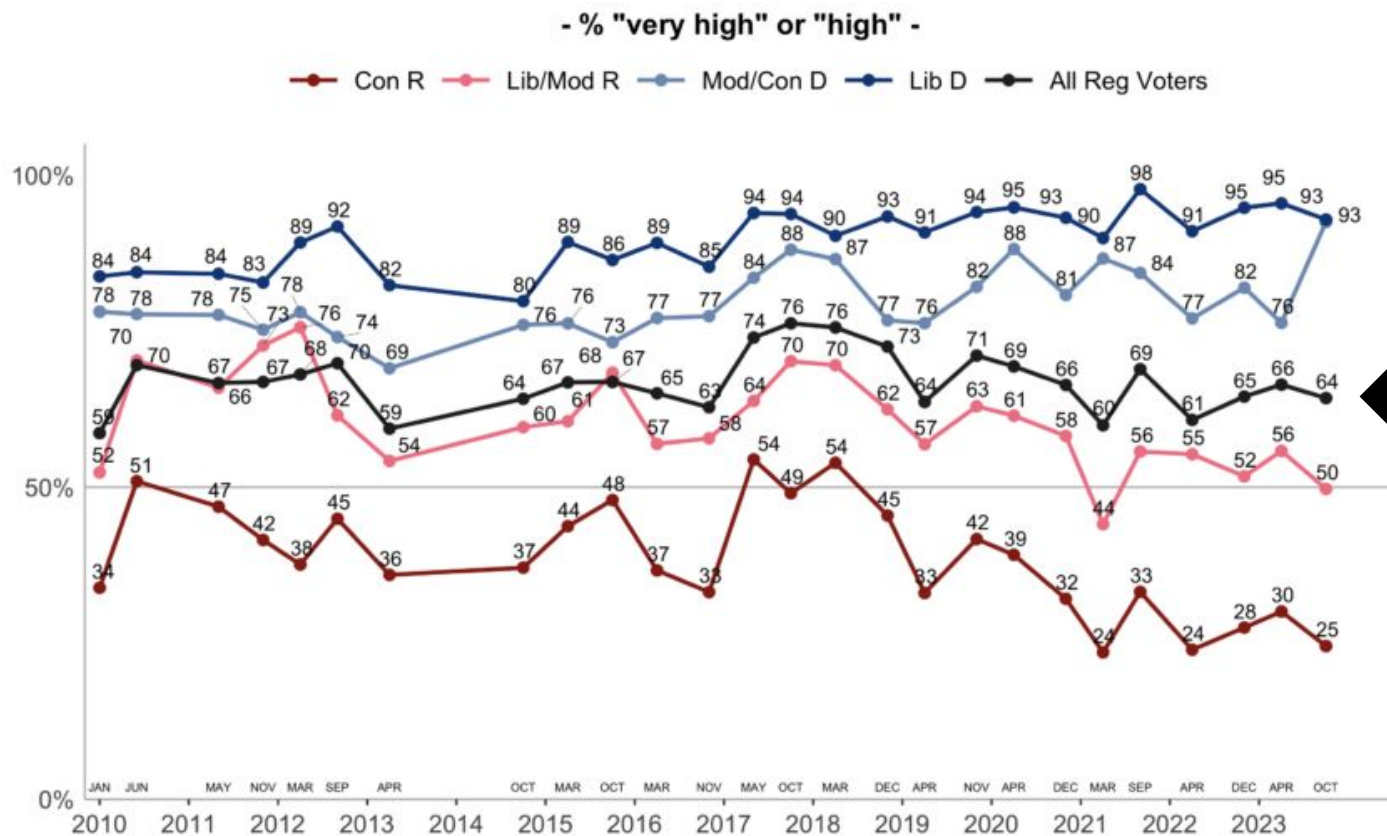

If given a choice, would you prefer to vote for a candidate for public office who [supports action on global warming] or one who [opposes action on global warming]?

Registered U.S. Voters, Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

Most registered voters (64%) think developing sources of clean energy should be a “high” or “very high” priority for the president and Congress

Do you think the following should be a low, medium, high, or very high priority for the president and Congress? [Developing sources of clean energy]

Registered U.S. Voters, Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

Most registered voters, including many Republicans, support climate-friendly energy policies

Bipartisan support for funding farmers

Registered U.S. Voters, Fall 2023

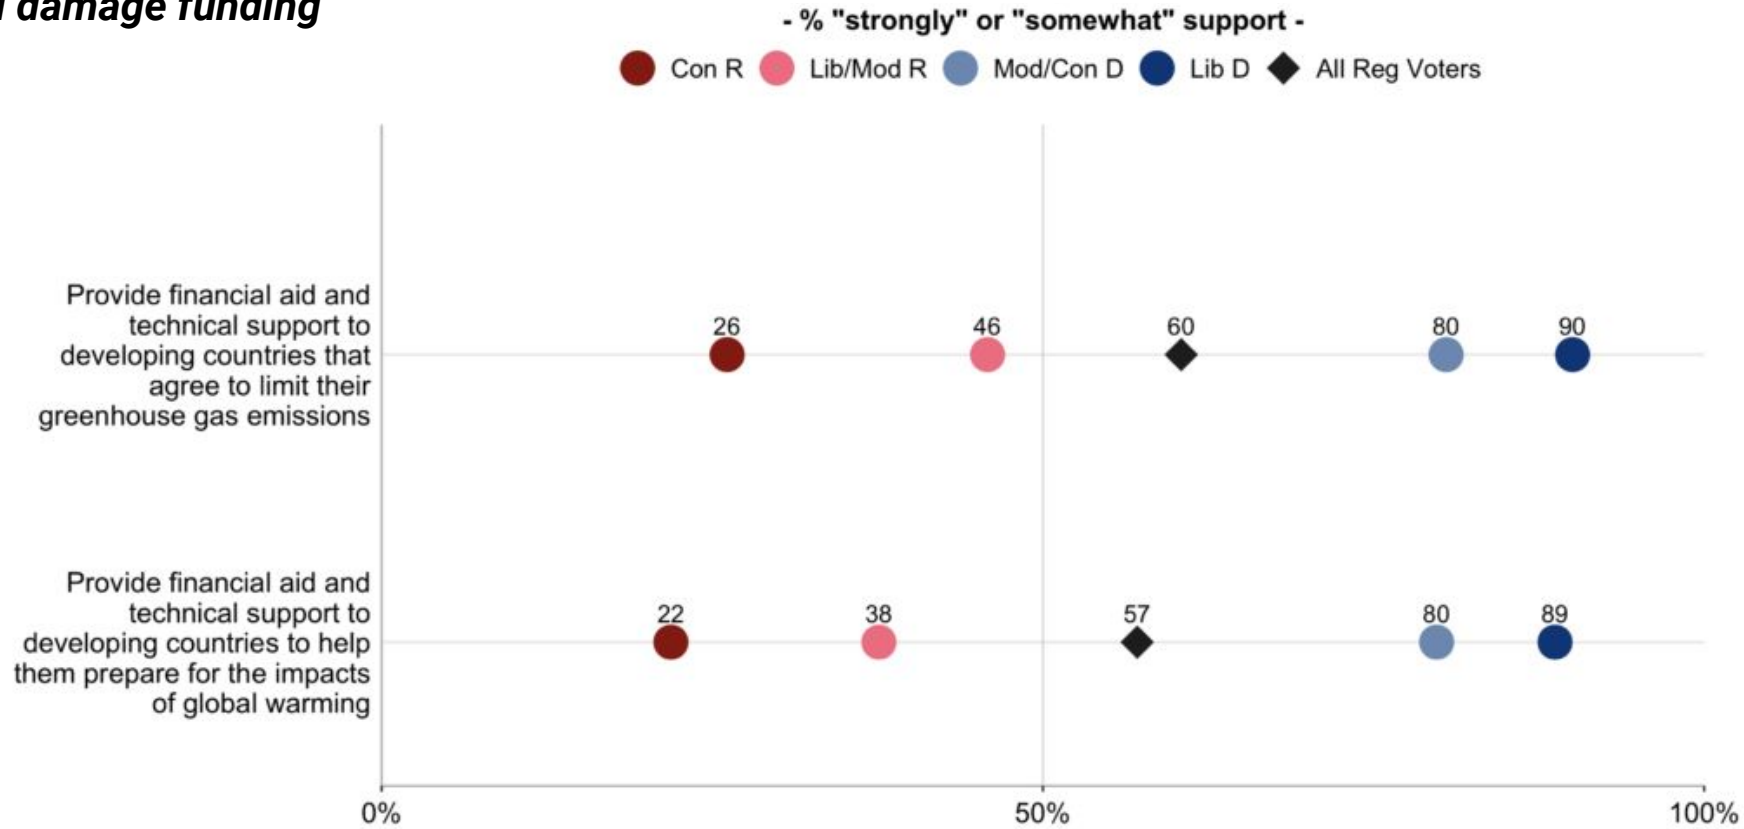

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

A majority of registered voters support the U.S. providing aid to developing countries for climate change mitigation and adaptation

i.e., loss and damage funding

Mitigation

Adaptation

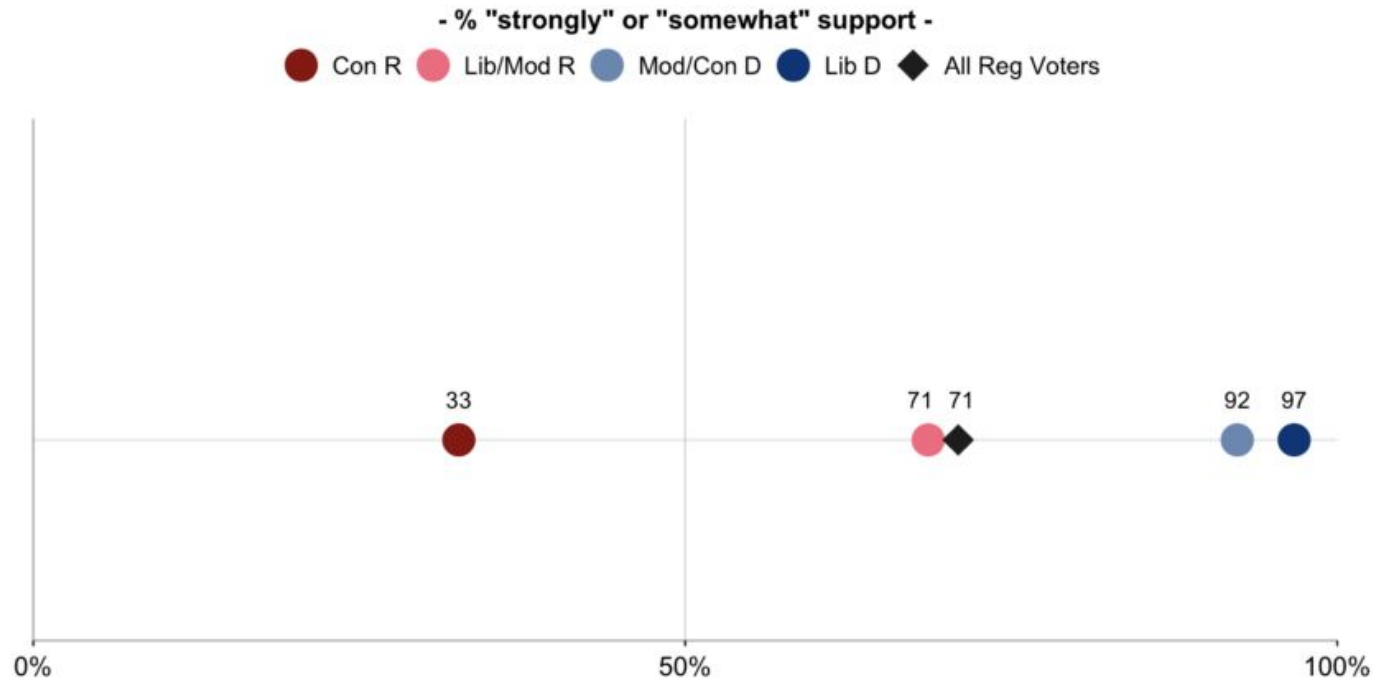

How much do you support or oppose the following policies?

Registered U.S. Voters, Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

A majority of registered voters (71%) support the Inflation Reduction Act (IRA) of 2022 after learning about it

But only 36% have heard “a lot” (12%) or “some” (24%) about it

The Inflation Reduction Act of 2022 (IRA) aims to curb inflation by reducing the federal deficit, lowering prescription drug prices and the cost of health insurance, modernizing the Internal Revenue Service, and investing in U.S. clean energy production. The law authorizes \$391 billion for developing clean energy and addressing global warming, including tax incentives and rebates to help consumers and businesses buy energy-efficient appliances, solar panels, electric vehicles, etc. The IRA also includes support for clean energy jobs and investments in communities that are most harmed by air and water pollution. It is the largest investment the U.S. government has ever made to reduce global warming, and is projected to help the U.S. reduce its carbon pollution 40% by 2030. The law will be paid for by closing tax loopholes. How much do you support or oppose this law?

Registered U.S. Voters, Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

Many registered voters (45%) think policies that promote clean energy will improve economic growth and create jobs

Please indicate which one of these statements comes closest to your own views – even if it is not exactly right: Overall, government policies intended to transition away from fossil fuels (coal, oil, natural gas) and toward clean energy (solar, wind) will...

Registered U.S. Voters, Fall 2023

Source: Yale Program on Climate Change Communication;
George Mason University Center for Climate Change Communication

About one third of Americans (31%) prefer a home in which *all* major appliances are powered by electricity

If you had the choice, which of the following would you prefer to live in (assuming costs and other features are the same)?

- A home in which all major appliances (stove, heating system, water heater, etc.) are powered by electricity
- A home in which most major appliances (heating system, water heater, etc.) are powered by electricity, but which has a gas stove for cooking
- A home in which most or all major appliances (stove, heating system, water heater, etc.) are powered by natural gas, propane, or oil
- No preference
- Don't know
- Refused

60%

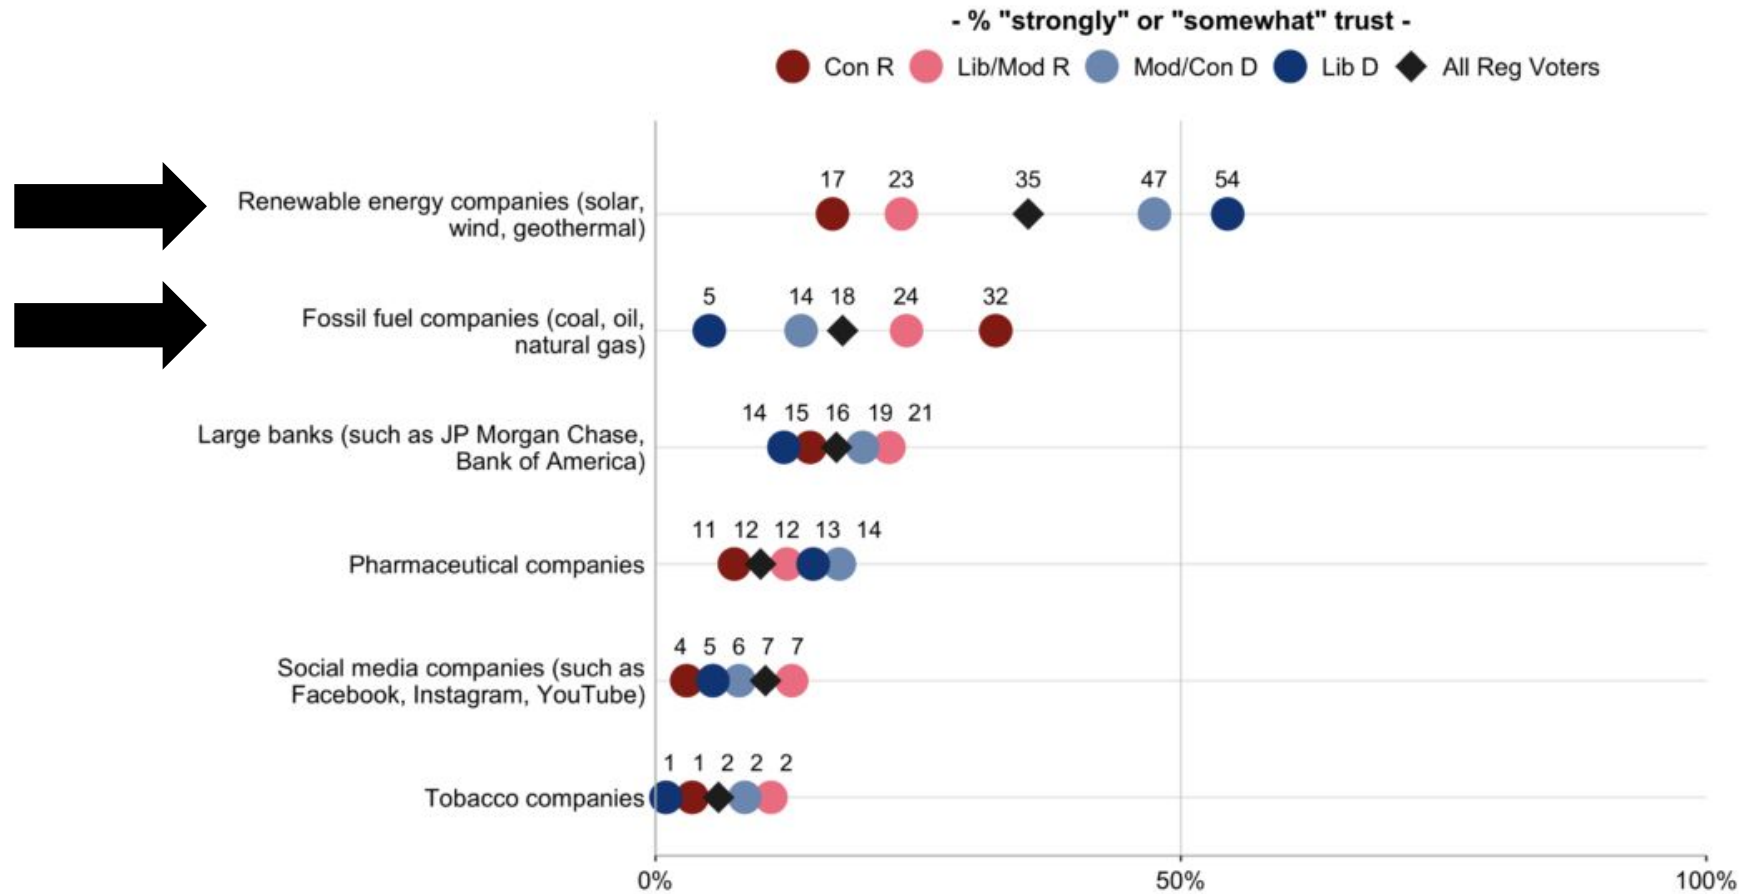

Chart: Based on Climate Change in the American Mind nationally representative survey (n=1,011) conducted from April 11 – May 1, 2023. • Source: Yale Program on Climate Change Communication & George Mason University Center for Climate Change Communication • Created with Datawrapper

Few registered voters (18%) trust fossil fuel companies to act in the public's best interest

How much do you trust or distrust the following to act in the public's best interest?

Registered U.S. Voters, Fall 2023

Source: Yale Program on Climate Change Communication; George Mason University Center for Climate Change Communication

- 1. Build public will.**
- 2. Build political will.**

Many Americans are willing to engage in climate action, but fewer have done so

Over the past 12 months, how many times have you done the following?

How likely would you be to do each of the following things if a person you like and respect asked you to?

March 2021, September 2021, April 2022, December 2022, April 2023, October 2023. Base: 6,190 U.S. adults.

How do we build willpower and grow a powerful movement?

Organize

Know who you're speaking with

Educate and Engage

Building a powerful, diverse movement

- Repeat simple messages often and use trusted messengers
- Spread stories and connect the dots
- Connect to people's values and identities
- Break the spiral of silence: Provide guidance on how to discuss climate
- Leverage social norms and experiences
- Overcome barriers to action: Make it easy, ask people to get involved, and provide options
- Communicate the benefits of action
- Inspire action through hope and feelings of efficacy

One simple message:
Five facts, ten words

**It's real.
It's us.
It's bad.**

**Scientists agree.
There's hope!**

Keep in touch.
